

Learn business by
building business across
7 Countries

Bachelors in **Management & Technology**

4 Years

Learn Globally. Lead Boldly.

Experiential. Hands-on. Practical.

8 SEMESTERS **7** COUNTRIES

At Tetr College of Business, we redefine what it means to study business. Through our immersive, hands-on approach, students don't just learn about the world—they experience it.

The curriculum is designed to foster entrepreneurial thinking and global leadership. Students gain real-world skills by building businesses, exploring diverse cultures, and collaborating with a network of industry leaders across seven countries. At Tetr, you're not just preparing for the future—you're creating it.

A global classroom where curiosity inspires innovation; diversity fosters connections & entrepreneurship cultivates change.

Ready to explore?

A foundation for global entrepreneurship.

INTERNSHIP

Any country of your choice

Study at world's most renowned institutes.

Tetr has partnered with celebrated institutions, providing world-class education and global opportunities to **help you thrive** in an ever-evolving business landscape.

Experience business **beyond** **textbooks.**

At Tetr, every class is a **hands-on workshop** designed with measurable outcomes. Instead of traditional Accounting 101, you'll learn to read a real balance sheet. In Marketing, you'll craft digital ads for platforms like TikTok. Finance becomes an opportunity to raise capital for your own venture.

Tetr's **'How to'** style workshops focus on market-relevant skills, making learning interactive and directly applicable.

Here, **theory meets application**, equipping you with the skills to build and grow a business in each semester.

What a semester at Tetr looks like!

From mastering supply chains to leveraging AI, embracing cultural insights to personal growth—here's what a semester at Tetr looks like.

Workshop excellence

| | | | |
|---|--|---|--|
| Management & Strategy (MAST) | How to identify and forecast macro trends | How to build solutions for global problems (Large Systems Thinking) | How to build a global supply chain |
| Sales & Marketing (SAMA) | How to advertise without spending money | How to price your products strategically | How to run digital ads on Tiktok, Meta, & Google |
| Finance & Fintech (FIFI) | How to invest in capital markets & build a portfolio | How do PE and VC firms work | How to read and analyse financial statements |
| Product & Tech (PRTC) | How to leverage machine learning to build business solutions | How to build apps using No-Code | How to build dashboards & use advanced excel |
| AI & ML (AIML) | How to leverage AI to automate content creation | How LLMs & AI actually work | How to use big data to drive decision making |
| Communication & Self Development COMM | How to use mental models to solve problems | How to craft a compelling personal portfolio | How to influence people without authority |

Business immersions

You will explore dynamic business environments and gain transformative insights that bridge theory and real-world application.

Emirates Airlines

Explore the daily operations that keep Emirates Airlines soaring

You will experience cultural diversity firsthand, develop cross-cultural communication skills and deepen your appreciation for global perspectives through immersive community engagement.

Lead the change with Tetr.

Learn more about the eligibility requirements and begin your journey with us.

Eligibility

Students who have successfully completed **Grade 12th** are eligible to apply. This includes students who are eligible to join college in 2025 from any recognized education board.

How to apply to Tetr?

Stage 1: Fill out the Application form

Fill out a brief application form to help us better understand you and secure your slot for the Tetr Trial, our AI-driven admissions assessment test.

Stage 2: Take the Tetr Trial during the selected slot

The Tetr trial is a 90-minute gamified assessment where we try to understand your aptitude, your skills, and how you think about the world around you.

Stage 3: Personal Interview with Industry Leader

Let industry leaders gain a deeper understanding of who you are, beyond the pages of your resume.

Stage 4: Application & Scholarship Decision

Admissions and scholarship decisions are released on a rolling basis. Accepted candidates have 14 days to respond, while waitlisted students may be offered any spots that open up. Rejected students can reapply the following year.

Hear from **our tribe.**

I feel very honoured to be a part of the Tetr Tribe and I know they got a whole bunch of applicants and they had to pick a few students to be a part of their first cohort and I am very very grateful for this. For me, the most exciting thing is to find a lot of like-minded people who are so different.

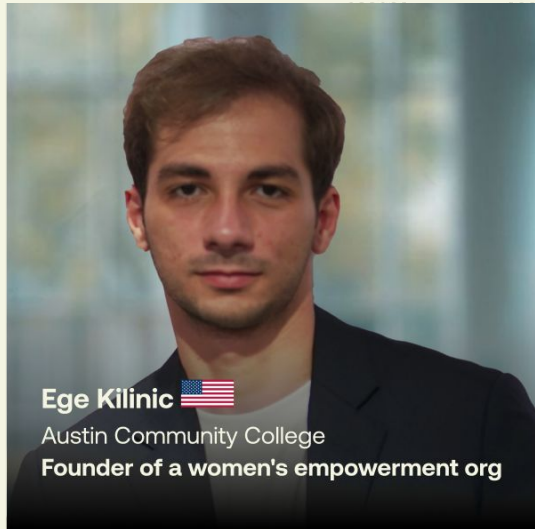

While building a business, you do not simply learn finance, sales, and marketing. You also need to learn resilience, discipline, and determination. Tetr has understood this very well when creating their curriculum and pedagogy: the education renaissance that will be created as a result is something that will be marked in the history of teaching.

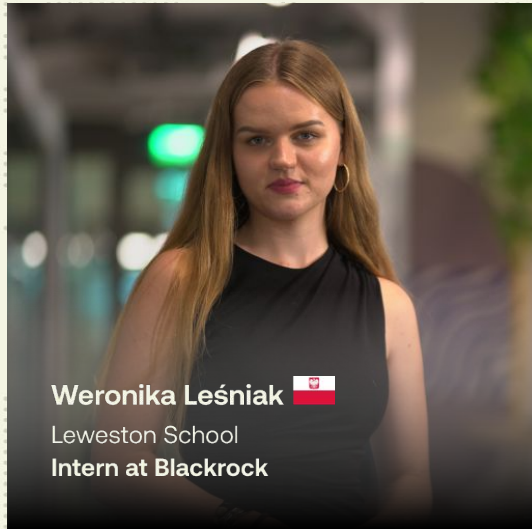

I'm grateful to be part of Tetr, where I'm learning to turn my passion into purpose. The innovative curriculum, global perspective and guidance from experienced mentors will help me grow both personally and professionally.

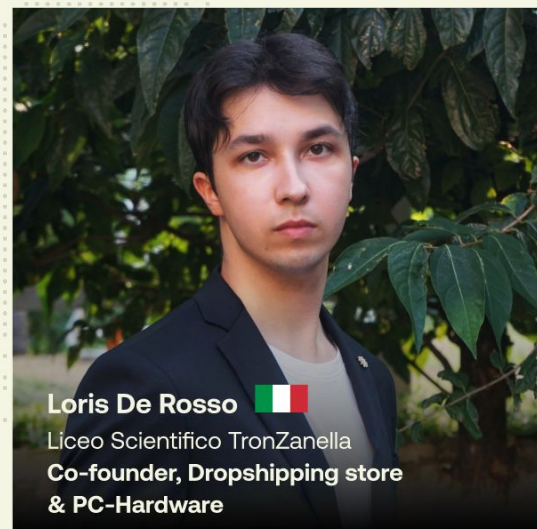

Hear from **our tribe.**

As a Tetr student, I experienced firsthand how transformative hands-on learning can be. This experiential approach will not only deepen my understanding of the business world but also equipped me with practical skills I can apply immediately.

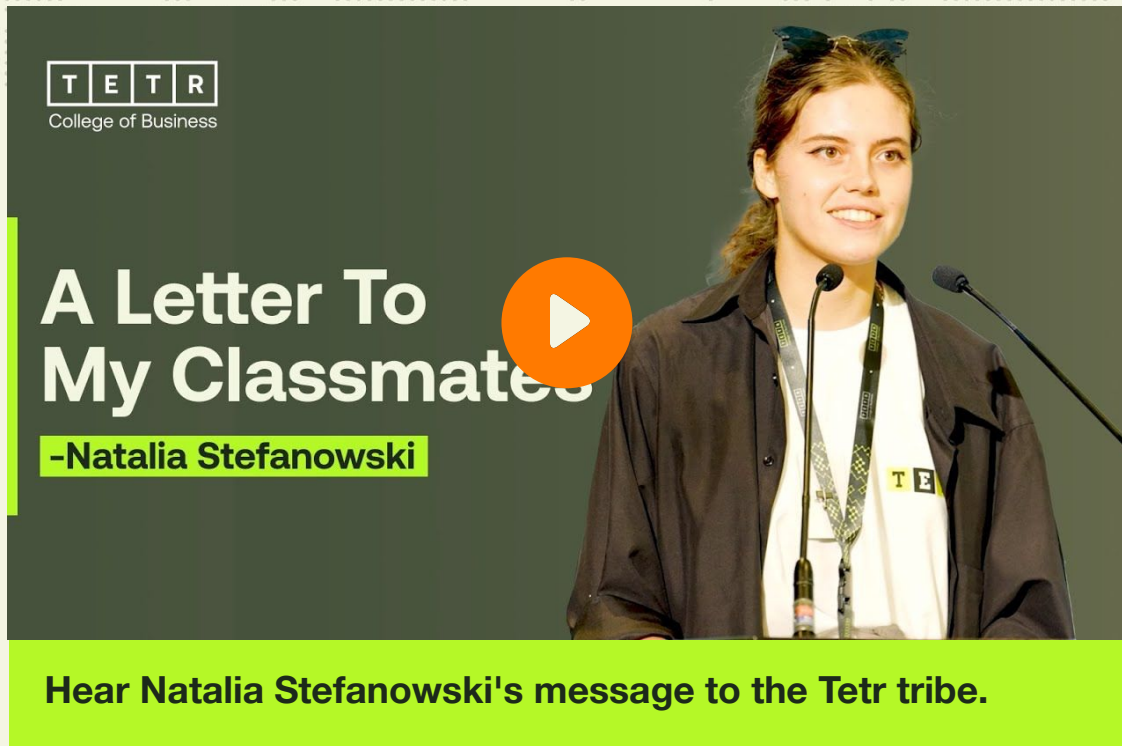

I've always felt that traditional education lacked something essential and wasn't working for me. I decided to enrol in Tetr after conducting thorough research and haven't regretted my decision ever since. I am excited to explore my potential throughout this journey and discover which industry and location in the world I am most passionate about impacting.

I discovered Tetr through a Nas Daily video, and it immediately caught my attention. The engaging masterclasses and motivated classmates create an ideal learning environment. I'm especially excited about studying at top universities while launching real projects.

Hear from **our tribe.**
